

Jacob Druery

+1 (250) 512-9769 | jacobedruery@gmail.com | linkedin.com/in/jacob-druery/ | jacobeli.dev | Canadian Permanent Resident

Education

BMIHMS | Sydney, Australia
Bachelor of Business

November 2014

Experience

Self-Employed | Rossland, BC
Web Developer

July 2022 – Present

- Collaborated between design team and clients to develop and deliver web solutions for businesses, enhanced online presence, and facilitate increased revenue growth.
- Identified and analyzed clients' competitors, interpreted client needs, and deployed results driven solutions to real-world problems. Performed post-deployment analysis on delivered products to further optimize product performance.

Alpine Grind | Rossland, BC
Staff Trainer / Barista

April 2018 – Present

- Fulfilled requirements for Canadian Permanent Residency status.
- Provided intensive staff training during periods of uncertainty and turnover to ensure a consistently high level of product and service.

ONEA Coffee, Swissotel Sydney | Sydney, Australia
Co-Founder / Operations Manager

August 2016 – January 2018

- Designed and realized a \$700k+ project on behalf of Swissotel Sydney, provided consultation based on extensive experience within the sector, and implemented measures to ensure project's continued financial viability after contract completion.
- Hired and trained a team of professionals to perform exceptionally in a competitive market environment, managed all day-to-day operations and growth, fostered a vibrant staff culture with a focus on enabling success amongst team members.

Workshop Espresso | Sydney, Australia
Manager

February 2015 – August 2016

- Oversaw operations of one of the highest volume establishments in the Australian coffee market, assisted in a transition of ownership, experienced annual revenue increase from \$1.5M to \$1.9M.

Projects

Rooted In Motion Manual Therapy – Healthcare Website/Social Media Content
Web Development

January 2023

Collaborative project to gain experience working with remote design team and ingrain fundamental web technologies.

- Liaised between client and design team to identify needs, enacted a plan to fulfill and exceed client's expectations in a timely manner. Performed ongoing analysis and maintenance on deployed implementation, and directly impacted increased business revenue of 20%.

DirtSurfer Backend – NodeJS/Express Web API
Web Development

March 2023

Personal project intended to deepen understanding of backend architecture in web apps, to utilize various emerging AI technologies, and to produce a usable, scalable database for real-world applications.

- Investigated, selected, and applied industry-standard technologies to develop a generative AI powered RestAPI for forecasting conditions for 73 local mountain bike trails. Achieved desired results and a high quality of data output over the course of its function, performed financial and data accuracy analysis to determine viability of continued deployment.
